

HOW TO AUTHORIZE RFGEN

Version 4.1

Unlock the Potential of RFgen

Authorization of RFgen has literally been simplified to a one-click process. Ensure that your RFgen installation continues to provide massive efficiencies to your organization well beyond the trial period.

HOW TO AUTHORIZE RFGEN

UNLOCK THE POTENTIAL OF RFGEN

INTRODUCTION

The Mobile Development Studio is the hallmark of the RFgen development environment, whereas the Mobile Enterprise Application Server installation contains the Mobile Enterprise Service Management tool and Mobile Enterprise Dashboard application which both provide a centralized console from where the production environment can be easily administered. It is common for the Mobile Development Studio and the Mobile Enterprise Application Server to be installed on separate servers with unique IP addresses. For complete functionality, RFgen should be authorized on all servers where the Mobile Enterprise Application Server has been installed. During the authorization process, the “System ID” is an essential value that is server-specific and used by DataMAX to generate an “Authorization Code” which permits the licensed operation of RFgen beyond the trial period.

Authorization has become a much simpler task with RFgen v4.1, since authorization can now be obtained instantly via the “Web Authorization” feature. This feature uses the Internet to obtain a valid “Authorization Code” which activates the RFgen software. “Web Authorization” is a convenient new feature for existing customers who have not incurred a “System ID” change.

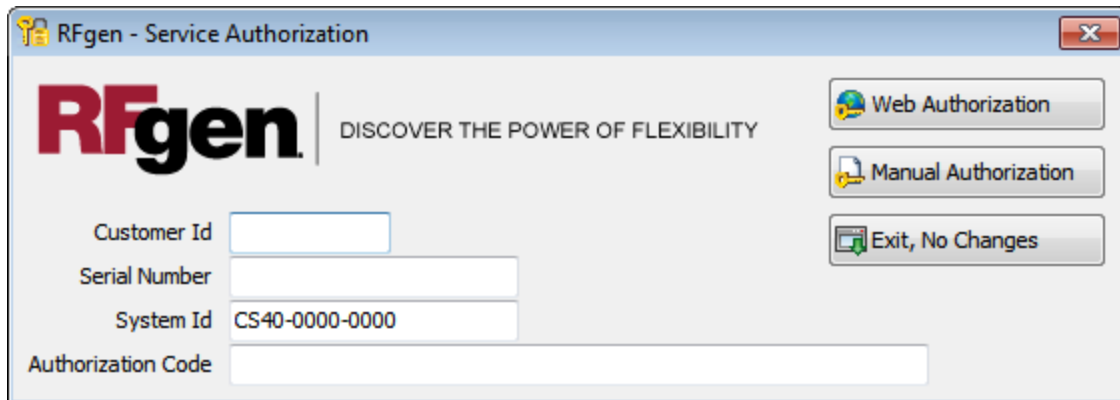

LICENSING AND AUTHORIZED USAGE

The Mobile Development Studio and all other applications of RFgen Software are products of the DataMAX Software Group, Inc. and must be properly licensed for continued usage beyond the trial period.

Installation of the Mobile Enterprise Application Server requires the procurement of a software license. For long-term or perpetual use, an activation code must be obtained within 7 days of installation. For RFgen evaluators, the Mobile Development Studio contains built-in Mobile Enterprise Application Server functionality which is reserved for product demonstration purposes only.

AUTHORIZING PRODUCTION: MOBILE ENTERPRISE SERVICE MANAGEMENT

Double-click the Mobile Enterprise Service Management icon in the system tray. In the “Service Status” group, click the “Authorizations” button.

The screenshot shows a window titled "RFgen - Service Authorization". The window features the RFgen logo and the tagline "DISCOVER THE POWER OF FLEXIBILITY". On the right side, there are three buttons: "Web Authorization", "Manual Authorization", and "Exit, No Changes". On the left side, there are four input fields: "Customer Id", "Serial Number", "System Id" (which is pre-filled with "CS40-0000-0000"), and "Authorization Code".

New Customers: Call RFgen technical support at (916) 939-4065 or email the System ID to support@rfgen.com.

Existing Customers: Ensure that the “Customer Id” and “Serial Number” fields are correctly populated. Click the “Web Authorization” button to automatically obtain an authorization code.

Note: Existing customers who have incurred a recent change to the System ID must follow the same instructions as new customers to authorize RFgen.
