SAP INVENTORY MANAGEMENT – ISSUE TO PROJECT

This application issues a material from inventory to a Project.

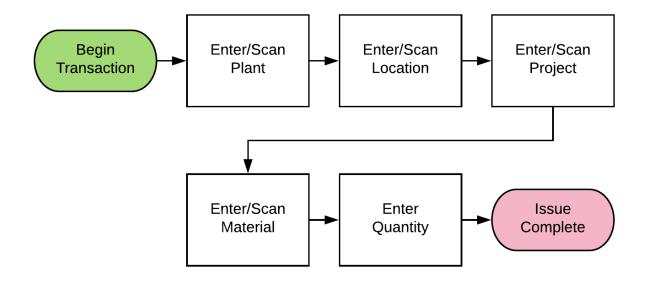

RFgen Functional Documentation 2019

RFgen provides its customers SAP-validated, ready-to-use suites of "Open Source" applications and a development environment that can be used to create new apps or to modify existing apps.

This document describes the business workflow and technical information used in this application.

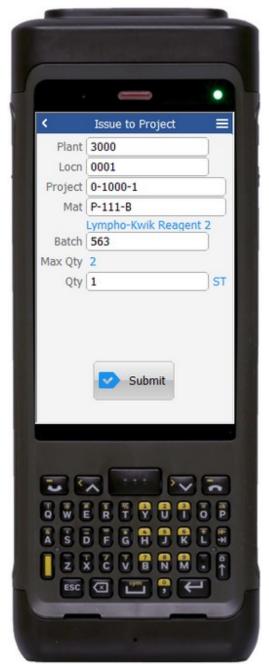

SAP: Inventory Management (IM) – Issue to Project

FIMII0203 IM – Issue to Project

This application issues a material from inventory to a Project.

user back to the menu.

Description of Workflow

First the user scans, enters, or searches for a plant value if one does not default from the user profile.

The user scans, enters, or searches for a location where the material exists.

The user scans, enters, or searches for a project.

The user then scans, enters, or searches for a material. To search for a material, the first one or more characters must be entered to reduce the search list results. The material's description will be displayed along with the Unit of Measure of the material next to the Quantity field.

If the material is Batch-controlled, the Batch field will be visible.

The user scans, enters, or searches for a batch number that is assigned to the material specified. The maximum quantity available of the material is shown.

The user enters the quantity they wish to issue.

The **Submit** button will post the issue of this material to SAP and reset the application.

The arrow in the upper left corner will take the

Technical Information
