FWHCO0200 WH – Transfer Confirm

This application allows the user to confirm one or more lines on a Transfer Order

Description of Workflow

First the user will scan, enter, or search for a warehouse value.

The user will then scan, enter, or search for a transfer order that has not been fully confirmed.

A list of unconfirmed lines is displayed with the line number, quantity and material description.

The user checks the box next to the lines they wish to confirm.

The user clicks the **Submit** button to post the lines to SAP and reset the application back to the Transfer Order field.

The arrow in the upper left corner will take the user back to the menu.

Technical Information

This lists the tables used for validations, searches and defaults by prompt.

Prompt	Table
Warehouse	T300T
Trans Order	LTAP / M_MAT1M / LTAK
App Update	L_TO_CONFIRM
